**Payvision Teams Up with Trustwave  
Top International Processor to Offer Merchants Superior Security and Compliance  
Solutions**

**September \_\_\_\_, 2008 – Amsterdam, The Netherlands and Chicago, Illinois.**

Payvision, one of the leading international payment solutions providers for the card-not-present marketplace, has partnered with Trustwave, the leading provider of on-demand data security and payment card industry compliance management solutions to businesses and organizations throughout the world, to provide its global merchant base with best-in-breed security and compliance services for multiple regulatory standards, including the Payment Card Industry Data Security Standard (PCI DSS).

PCI DSS is the payment card industry security requirement for entities that store, process or transmit cardholder data, and has been endorsed by all major card brands –Visa Inc., MasterCard Worldwide, Discover Network, American Express and JCB. Merchant compliance requirements are segmented into four levels based on the number of transactions a merchant processes annually.

The new alliance will afford Payvision customers the ability to take advantage of Trustwave's outstanding suite of technology and services, including its flagship TrustKeeper® on-demand compliance management technology, which provides the tools necessary to validate PCI DSS compliance.

When necessary, Payvision will offer its merchant population access to Trustwave technology and services to support real-time compliance. Such services include TrustKeeper Agent, a comprehensive solution that provides insight into the compliance posture of the organization, performs policy checks on each system it is installed to inspect for prohibited data storage and securely sends the data to TrustKeeper. Other services include SSL certificates for e-commerce merchants and help-desk support for those organizations needing additional assistance to become PCI DSS compliant.

"We are excited to partner with a company of Trustwave's reputation in the security solutions arena," says Rudolf Booker, CEO of Payvision. "Our combined efforts will provide the international payment processing community with unparalleled programs to meet the challenges all merchants face with compliance and security issues."

Payvision offers card-not-present processing services via its secure, PCI DSS-compliant platform for all major credit cards including Visa, MasterCard, American Express, Discover Card, Diner's Club, Carte Blanche, JCB and Carte Bleue.

"The payment processor is the key conduit to validate PCI DSS compliance throughout the industry," says Robert J. McCullen, Chairmand and CEO of Trustwave. "Payvision understands that our technology will help their merchant population validate compliance with a strict regulatory mandate, resulting in secure transactions."
