Payvision Engages With Ezic

Top International Processor To Expand Global Footprint

September 3, 2008 - Amsterdam, The Netherlands - Payvision, one of the leading international payment solutions providers for the card-not-present marketplace, announced today it has entered into a strategic partnership with Ezic, Inc., the largest private-label gateway provider in the electronic transaction industry. This new alliance will afford Ezic's resellers the opportunity to take advantage of Payvision's global domestic acquiring expertise and significantly reduce their international operations costs and increase profitability.

"We are very pleased to join forces with Ezic and enhance their secure, value-added solutions to real market demands," says Rudolf Booker, CEO of Payvision. "Our exceptional multi-currency solutions superbly compliment their robust processing platform and high-risk feature sets that have been time-tested for nearly a decade by the most complex Internet merchants."

Payvision offers card-not-present processing services via its secure, PCI-compliant platform for all major credit cards including Visa, MasterCard, American Express, Discover Card, Diner's Club, Carte Blanche, JCB and Carte Bleue.

"Ezic delivers high-end payment gateway solutions specifically developed for high-volume, complex Internet merchants that require advanced processing options and comprehensive business management tools," says Locke Walsh, CEO of Ezic. "Our new partnership with Payvision will provide our resellers with additional opportunities to efficiently and effectively build and expand their international businesses through a fully integrated turnkey application."
