Open loop payments for public transport

Ready to go from closed to open loop payments? Payvision's solutions are built for transport operators, delivering custom and scalable payment solutions to help you scale your transport network.

Revolutionize the way your commuters travel

As cities become smarter with technologies that enable a better way of life, open loop payments are becoming a must-have. Streamline your operations, make long queues a thing of the past and boost commuter satisfaction providing a secure and frictionless payments experience.

Open the doors to enhanced efficiency and higher revenues

An open loop set up helps transport authorities improve ticketing infrastructure while reducing back-office processing costs, compared to closed loop methods that face numerous challenges around card acquisition time and cost. For your peace-of-mind, a debt recovery system helps reduce fraud and recover ticketing costs from cardholders with insufficient funds.
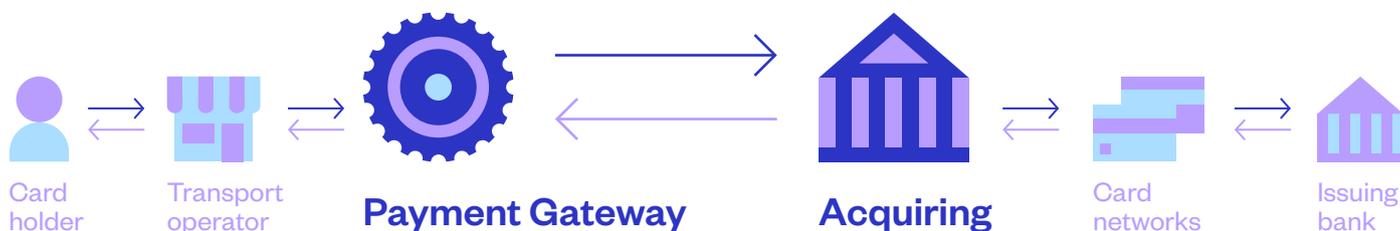

Payvision takes care of the complexities

We're fully certified and compliant with mass transit card scheme requirements for Visa and Mastercard. Our mass transit sector expertise means we're adept at managing the complexities during your set up, while our strong collaboration with Visa and Mastercard ensures you'll hit the ground running in no time.

Perks

	Dedicated relationship management access
	Transparent IC++ pricing structure
	Proven experience in transport sector
	Debt recovery mechanism
	Accept all European currencies

An overview of our acquiring solution

Here's how we work behind the scenes to process your customer's transactions for your open loop set up.

Card holder

Transport operator

Payment Gateway

Our gateway partners are PCI-certified, and fully compliant with card scheme rules for mass transit transactions.

Acquiring

Card networks

Issuing bank

▪ Risk Management

We'll work with you to set up a secure open loop payments workflow that lowers your risk of fraud.
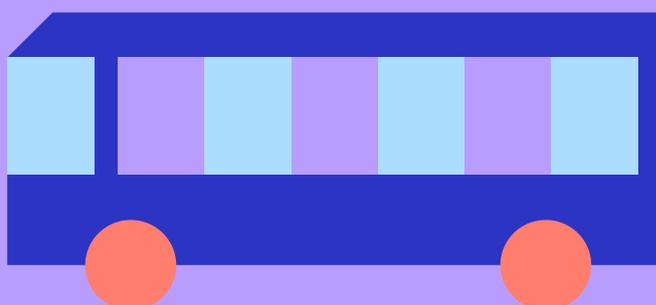

▪ Debt recovery

Our solutions include a debt recovery mechanism to ensure you're able to reclaim ticketing costs due to insufficient funds.

▪ Settlements

We help you enjoy higher conversion rates in transaction numbers, and lower settlement costs when your customers transact in local currencies.

▪ Reporting

We provide consolidated reporting to heighten transparency in your cashflow and uncover transaction trends.

How to set up open loop payments for transport operators

1	We'll take you through our intuitive onboarding process to get some important information from you.
2	We'll set you up to start accepting a broad range of cards.
3	We'll establish a secure connection to our payments infrastructure to ensure smooth payment flows.
4	We'll run rigorous testing to ensure nothing's left out, including a testing session with Mastercard or Visa to ensure compliance.
5	When everything's ready, we'll go live with your new open loop payments framework and continue to identify optimization opportunities in future.

What you'll get with us on your transition to open loop payments

- We'll have you set up and ready to go, with full dedicated support
- Our mass transit experience is proven to work in multiple European cities
- Eliminate long queues and increase your ridership with a fast, frictionless payments experience
- We're supported by ING, Mastercard and Visa to guarantee your satisfaction
